

MRI-Safe IV Splints

Designed for Patient Comfort | Stability Safety Better Care

Rowe Medical's MRI-safe IV splints are among the only locally manufactured solutions of their kind available in Australia. Designed specifically for hospital environments, the splints feature a soft foam outer for patient comfort combined with a removable plastic splint insert, allowing the product to remain suitable for MRI procedures without compromising patient stabilisation.

Developed with clinical practicality in mind, the design supports quick application, ease of use for healthcare professionals, and improved patient comfort across a range of care environments including emergency departments, paediatric wards, and general hospital settings.

Designed For:

- Emergency departments
- Paediatrics
- Maternity wards
- Imaging environments

Locally Made. Clinically Trusted.
